RELEVANT EXPERIENCE

UI/UX DEVELOPER

Mindruby Technologies   June 2023 - Present

- **Designed intelligent**, AI-enhanced user interfaces in Figma to accelerate prototyping, streamline workflows, and boost creativity.
- **Developed responsive** and accessible web pages using HTML, CSS/SCSS, Angular/React, Bootstrap, and Tailwind, ensuring scalability and performance.
- **Implemented AI-driven** personalization to build adaptive, behavior-based interfaces that enhance user engagement.
- **Maintained scalable design** systems with WCAG compliance and AI-powered accessibility tools for consistent, inclusive user experiences.
- Utilized Webflow and AI-assisted workflows for rapid website design, animation, and deployment, reducing production time.
- Leveraged AI in Marketing Cloud to deliver data-driven, personalized campaigns that improved user engagement and conversion rates.
- Collaborated with AI copilots and **code generation tools** to ensure accurate design-to-code translation and maintain visual consistency.
- **Conducted user research** with AI-powered analytics and usability testing tools to identify pain points and optimize experience flows.
- **Stayed current with AI-driven UX trends**, generative design, and automation-first practices to continuously innovate digital experiences.
- **Focused on human-centered design** principles to ensure AI integration enhances emotional and visual user connection.
- Integrated conversational and generative AI components into digital products to create more **intuitive and interactive user experiences.**

UI & WEBSITE DEVELOPER

SynQues   Nov 2022 - May 2023
